Projects

Zomato-Clone

It's a food-ordering website. It has many features like searching, sorting, filtering, pagination, adding items to a cart, and many more. Also, it is a dynamic website, and it's responsive. For the front-end part of this project, I used React, HTML, CSS, and Bootstrap and for the Back-end portion I used Node JS and Express JS and for the Database I used MongoDB. Also, It is deployed on Render.

Doctor Appointment Book

Its a simple Doctor Appointment Book app where you can select doctors based on their categories and check their schedule. Its fully dynamic and responsive. For the front-end part of this project I used React, html, css, BootStrap and for the Backend portion I used Node Js and Express Js and for Database I used MongoDB. Also It is deployed on Render.

PORTFOLIO

Its is made with React, html, css and Bootstrap and it is fully responsive. All my projects are uploaded there. Check it out-
